BALAKRISHNAN M

MERN Stack Developer

Chennai, Tamil Nadu | +91-9384590539 | balakrishnan.code@email.com
GitHub: github.com/Bala-self | LinkedIn: linkedin.com/in/balakrishnan-m-509aa8423 | Portfolio: bala-self.github.io/portfolio_me

PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with a proven track record of engineering high-performance full-stack applications. Specialized in building secure RESTful APIs with Node.js and Express.js, architecting scalable MongoDB databases, and developing responsive frontends using React.js and Next.js. Adept at Agile methodology, database optimization, and modern AI engineering workflows to deliver scalable enterprise solutions.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Server-Side Rendering (SSR)

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, bcrypt, Middleware Architecture, Query Optimization

Database: MongoDB, MySQL, Mongoose ODM, Database Indexing & Caching

DevOps & Tools: Git, GitHub, Vercel, Render, Postman, VS Code, Razorpay Payment Integration, Agile Methodology

AI Tools: Claude AI, GitHub Copilot, ChatGPT, Prompt Engineering

Currently Learning: TypeScript, Next.js 14, Docker

WORK EXPERIENCE & PROJECTS

Independent MERN Stack Developer (Full-Stack) — Jun 2026 – Present

BillPro (Billing Software) – GST Billing & Business Management System

- Built BillPro, a full-stack MERN GST billing & business management system centralizing CGST/SGST/IGST, discount & round-off logic.
- Developed 16+ secured REST modules — invoices, products, purchases, quotations, customers, employees, reports — with JWT auth, bcryptjs, Helmet & rate limiting.
- Implemented backend-validated inventory with stock-movement tracking, customer balance updates & PDFKit generation.
- Shipped Jest + Supertest API tests, MongoDB indexes, pagination & aggregation reports for scalable operations.

Pizza Palace – Full-Stack Online Food Ordering Platform

- Architected a scalable MERN food-ordering platform supporting 50+ menu items with real-time price updates and cart management, reducing order processing time by 60%.
- Engineered secure user authorization using JWT and bcryptjs with protected admin routes and Role-Based Access Control (RBAC) for 100+ concurrent test users.
- Integrated 15+ custom API endpoints for real-time CRUD operations, achieving a <2s page load time and 95+ Lighthouse performance score.
- Built an admin order dashboard with a dynamic order-status workflow (Preparing, Out for Delivery, Delivered) and secure environment variable management.

Frontend UI Developer (Freelance) — Feb 2026 – Mar 2026

TripAdvisor Clone – Responsive Travel Platform UI

- Developed a pixel-perfect, mobile-first responsive UI with 470+ lines of custom CSS, maintaining cross-browser compatibility for 100% of users.
- Designed a high-conversion 8-section homepage including dynamic hero search and category sliders, improving UI engagement metrics in testing with 0 layout shifts.
- Implemented complex Flexbox layouts and hover effects to optimize rendering performance, reducing page load time by 40% (<2s load).

EDUCATION

B.E – Robotics and Automation — **2021 – 2025**
Dhanalakshmi Srinivasan Engineering College, Perambalur, Tamil Nadu
CGPA: 7.4 | First Class

CERTIFICATIONS

- The Complete MERN Stack Developer Masterclass
- Entry Level Prompt Engineer – EMC | 2025

ADDITIONAL INFORMATION

Languages: Tamil (Native), English (Professional Proficiency)

Availability: Immediate joiner | Open to on-site roles across Tamil Nadu
